Dear Student:

The following publication is based on the results of the annual survey conducted by my Research and Analytical Services Section, Prince Edward Island Department of Industry. The report summarizes the outcomes of those persons who graduated from University of Prince Edward Island, Holland College, Canada Employment and Immigration sponsored courses and Vocational High School courses.

The success of previous graduates is one of the important factors to take into account when choosing your career. I am hopeful that the results of the survey will be helpful to you in making your career decisions.

I wish you every success in whatever occupation you should decide to pursue.

Yours sincerely,

Leonce Bernard

## INTRODUCTION

This publication is the sixth of what is an annual report prepared by the Prince Edward Island Department of Industry. The purpose of the publication is to provide persons with information on how the graduates of training courses fare in finding a job. The data provides a statistical picture of what has transpired with graduates of the past and does not constitute a guarantee for graduates of the future, since labour market conditions and employment situations will continue to change.

The publication is based on the 1982, 1983, 1984 and 1985 and 1986 Student Follow-up Survey which were conducted by the Prince Edward Island Department of Industry in the summers of 1983, 1984, 1985, 1986 and 1987. All University of Prince Edward Island and Holland College Post secondary graduates were included in the survey as well as graduates of the Canada Employment and Immigration sponsored courses of more than 20 weeks in length. Also in the past five years we have included the Vocational High School graduates.

Each graduate was asked to indicate their current activity. For those who were employed they were asked to provide a description of their duties (which was used to code their occupation), their average earnings, and if the job was related to their training. All respondents were asked to indicate their current residence which was used to determine how many had left Prince Edward Island. The number of surveys sent and returned as well as the response rate is also included. The number of graduates we were unable to locate is also included. As well, for each course, there is a description of course content, duration, prerequisites and possible employment establishments. Much of the information on course descriptions come from Holland College, Canada Employment and Immigration Commission publications or the University of Prince Edward Island.

The percentages are calculated as follows, the employed and unemployed are based on the total number in the labour force which of course excludes those out of the labour force. The employed in a job directly/indirectly related to their training is a percentage of the total employed.

The average earnings are based on the total number employed.

Handbook users should note that survey statistics for some courses are based on small numbers of respondents. Therefore, the data should be used with caution as well as judgement.

Page two presents a list of occupations that Canada Employment and Immigration Commission has designated as being in a shortage situation.

We hope that the information will be beneficial for students making a career decision. If you require additional copies of the publication, please contact:
